

Nguyễn Cao Minh

Software Engineering

☎ 0708605649 ✉ caominhnguyen03@gmail.com 🔗 <https://github.com/Kaminich> 📍 Thu Duc City, HCMC

OBJECTIVE

I am a fresher in React and Java, with a specialization in SAP ABAP. I am a highly motivated and curious individual who wants to learn and grow. I take my work seriously, always striving to give my best in every task, and I embrace challenges as opportunities to improve. I'm currently looking for a chance to prove myself and would be truly grateful for the opportunity to be considered for this position. My long-term objective is to become a senior software engineer who can contribute to impactful projects across different technologies.

EDUCATION

FPT University (Bachelor's Degree) 2021 - 2025

Major: Software Engineering

GPA: 3.13/4

WORK EXPERIENCE

FPT Telecom 01/2024 - 05/2024

Frontend Developer Intern

- Collaborated with backend developers to implement responsive web interfaces using ReactJS and TypeScript.
- Optimized performance and accessibility across multiple browsers and devices.
- Manage source code using GitHub.
- Gained hands-on experience with RESTful APIs. Improved existing features based on user feedback.

PROJECTS

Scheduling Dental Clinic Platform

(May 13 - July 20)

Brief	A platform for patient to make appointment and clinic to register and manage customer appointments
Team size	5
Position	Frontend Developer
GitHub	FE: https://github.com/Kaminich/scheduling-dental-clinic-platform-fe.git BE: https://github.com/Kaminich/scheduling-dental-clinic-platform-be.git
Responsibility	<ul style="list-style-type: none">• Designed and implemented intuitive UI/UX for web application• Defined and structured the core user flow and navigation across the platform to ensure seamless interaction• Integrated frontend with backend APIs to fetch and display real-time data from the server• Optimized frontend performance
Technologies Used	HTML/CSS, React Typescript, Java Spring Boot, PostgreSQL, JWT, Render, Cloudinary, Gmail.

Opalwed

(Oct 12 - Nov 24)

Brief	A school start-up project about wedding planning platform where customers select products/services for their event, and the platform handles all purchases or rentals directly with third-party vendors.
Team size	3
Position	Fullstack Developer - Team Leader
GitHub	FE: https://github.com/Kaminich/OpalWed-fe.git BE: https://github.com/Kaminich/Opalwed-be.git
Responsibility	<ul style="list-style-type: none">• Designed and implemented intuitive UI/UX for web application• Defined and structured the core user flow and navigation across the platform• Integrated frontend with backend APIs to fetch and display real-time data from the server• Optimized frontend and backend performance• Built APIs CRUD for admin to manage
Technologies Used	HTML/CSS, React Typescript, Java Spring Boot, PostgreSQL, JWT, Cloudinary, Gmail, PayOS, Docker.

SKILLS

Technical Skills	Intermediate in HTML/CSS, React Typescript, GitHub, Postgre SQL, MS SQL
Programming Skills	Good at Java Spring Boot, SAP ABAP
Language	English - B2 level (estimated, equivalent to IELTS 5.5–6.0).
Soft Skills	Time Management, Self Learning, Team Work, Logical Thinking, Problem Solving

HONORS & AWARDS

FPT University Honorable student of Summer and Fall semester.	2024
FPT University Honorable student of Spring semester.	2025

CERTIFICATIONS

IBSTPI Certificate	2023
--------------------	------

ACTIVITIES

FPT University	08/2023 - 12/2023
Brother & Sister	
A student-led mentorship program designed to support and guide freshmen through academic, social, and campus life challenges during their transition into university.	
Programming Tutor	05/2024 - Now
